RED STAG JUNÍN

JUNÍN DE LOS ANDES, NEUQUEN, ARGENTINA

Red Stag Junín ranch is located on a 100,000-acre family owned estancia in the high desert foothills of the Andes. Situated in the province of Neuquén, approximately 40 miles southeast of San Martín de los Andes, the ranch is a 2-hour and 30 min. drive from Bariloche (BRC) airport and 2 hours' from the San Martín airport (CPC).

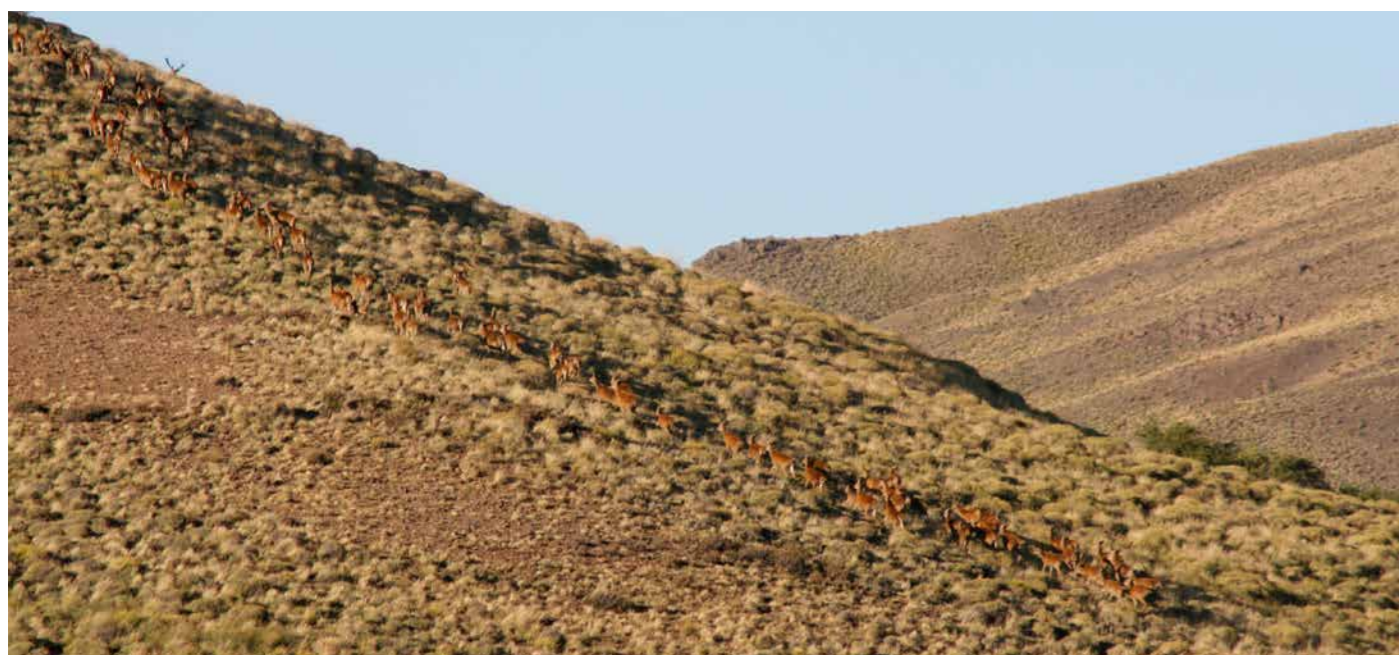

The surrounding landscape is made up of lush green valleys and intimate creeks, set against a backdrop of awe-inspiring peaks. Red stag frequent the rich pastures where they come to feed, fight and ROAR.

You'll also see a wide variety of native animals such as guanaco (a type of wild llama), choique (rhea), wild boar, puma, fox, and much more.

Red Stag season coincides with the rut—known in Argentina as the 'brama'. The vast estancia is entirely unfenced and hunters will encounter free ranging herds of deer throughout the day.

A pair of hunters will be accompanied by one of our guides, all of whom have an intimate knowledge of the terrain. Guests will move to their chosen hunting grounds by a combination of trucks and horses and then progress on foot. Hunters will stay in a newly refurbished house, close to the main estancia. With wood stoves and a cozy living room, this simple but comfortable lodge is the perfect place to unwind after a day's hunting.

- Hunters will return to the lodge at midday, for lunch and a siesta.
- You will begin around 2 to 3pm for your afternoon hunt. In the evening we hunt until dark, but with just enough light to get back to the lodge safely.
- In addition to trophy stags, there are opportunities to hunt culpable deer, along with the pure wild European boar that thrive as well in this area.

SPECIES

RED STAG

We are located right in the heart of the Andes high desert hills range, this area offers one of the most dense stag populations in the country and is very common to see hundreds of deer a day.

Hunting in northern Patagonia is very similar to the hunting in the rockies, where hiking and horse backing is the norm. The best time of the year to chase big bulls is during the peak of the rut, which is usually between mid-March and mid-April.

This part of Northern Patagonia where our ranch is located, offers the possibility of combining red deer hunting with great trout fishing. The best stag country is crisscrossed by some of the best trout streams in South America. This is a great option for a non-hunting partner.

WILD BOAR

Wild boar (*Sus scrofa*) from Europe were introduced into Patagonia (Argentina) around 1890. Their colonization pattern follows rivers and lakes, moving vertically from the original release site on the eastern desert hills to the western forested mountains. During the last 60 years, the area occupied by wild boar has increased throughout all Patagonia.

Our ranch in Junín has a permanent population of pigs and during the Red Stag rut is common to see big tuskers among sow and piglets. It's a great added hunt!
